Email: ajaygangwar945@gmail.com
 Mobile: +91-8283024392

SKILLS

• Languages:	Python, C/C++, JavaScript, Java
• Frameworks:	React, NodeJS, HTML and CSS, Tailwind CSS
• Tools/Platforms:	MySQL, MongoDB, Figma, MS Excel, Power BI, Git, GitHub, Gitlab, Linux, AWS, Docker
• Core CS Fundamentals:	DBMS, OS, CN, SQL, OOPs
• AI/ML & Data:	Pandas, NumPy, Seaborn, Scikit-learn, Matplotlib
• Soft Skills:	Problem-Solving, Time Management, Leadership, Team Work, Adaptability

PROJECTS

Cyber Warfare Intrusion Detection GitHub Live	Dec '25 - Jan '26
- Designed a real-time intrusion detection system using machine learning to classify network traffic as normal or anomalous. - Developed an optimized SVM model with RBF kernel achieving 98.5% accuracy on NSL-KDD-based network dataset. - Built a modern interactive dashboard with 12 real-time stats cards and 6 dynamic charts for detailed threat visualization. - Deployed a scalable Flask-based backend with live APIs enabling fast real-time prediction and monitoring of cyber threats. Tech Stack: Python, React, Scikit-learn, Pandas, NumPy, Flask, HTML, CSS, JavaScript	
Ayush Intelligence GitHub Live	Sep '25 - Oct '25
- Designed a scalable decoupled architecture using Fast API (backend) and React (frontend) for AYUSH-ICD-11 interoperability. - Developed REST APIs using Fast API and Python for intelligent search and translation across a 1000+ medical term dataset. - Built a responsive frontend using React, Vite, and Tailwind CSS with adaptive dark/light theming and smooth UI interactions. - Deployed the application as a unified monolithic system with optimized builds, automation scripts, and backend integration. Tech Stack: Python (Fast API), React, TypeScript, HL7 FHIR R4, ICD-11	
ATS Resume Score GitHub Live	Mar '25 - Apr '25
- Designed an AI-powered resume analysis system with ATS scoring (0–100%) using Streamlit and advanced Gemini AI models. - Developed an efficient multimodal pipeline converting PDF resumes to high-quality images for accurate layout-based analysis. - Integrated Gemini API to extract 10+ key skills/keywords and generate personalized career recommendations. - Deployed the application on Streamlit Cloud with secure API key management, enabling real-time analysis within seconds. Tech Stack: Python, Streamlit, Google Gemini API, Pillow, pdf2image	

TRAINING

Code Query - Lovely Professional University GitHub Live Certificate	Jun '25 - Jul '25
- Designed an enterprise-grade conference portal supporting 4 user roles using Oracle 19c and Oracle APEX for workflows. - Developed database logic with 10+ tables, triggers, and stored procedures to automate submission, review, and processes. - Implemented secure role-based access control with validations to manage users, submissions, and reviewer assignments. - Built paper submission, review scoring, and tracking across 3+ status stages (Submitted, Accepted, Rejected) with reliability. Tech Stack: Oracle Database 19c, Oracle APEX, SQL, PL/SQL	

CERTIFICATES

• Agile Project Management HP Link	Feb '26
• Data Science & Analytics HP Link	Feb '26
• Introduction to Modern AI Cisco Link	Nov '25
• Python for Data Science NPTEL Link	Feb '25
• Fundamentals of Network Communication Coursera Link	Sep '24
• Software Engineering Coursera Link	May '24

ACHIEVEMENTS

• Achieved 2nd place among 1k+ participants at HackTheBlock and won \$300 for a high impact blockchain project.	Jun '25
• Secured 2nd Rank in AI in Web Development and developed an AI-driven language learning platform using Python.	May '24

EDUCATION

Lovely Professional University Bachelor of Technology - Computer Science and Engineering; CGPA: 7.46	Phagwara, Punjab Aug '23 - Present
Vidya Bhavan Public School Intermediate; Percentage: 72%	Bareilly, Uttar Pradesh Apr '21 - Apr '22
Vidya Bhavan Public School Matriculation; Percentage: 94%	Bareilly, Uttar Pradesh Apr '19 - Apr '20
